

Feed Shortage 2018

Family Night – Fodder Shortage

In a season where every tonne of dry matter grown has significant value to farmers, irrigation takes on a heightened level of importance. Join your neighbours and specialist feedbase advisors to discuss the best fodder management and water use options for your region and how to make the most of this season as the national fodder and grain markets continue to tighten.

Matt Harms, ONFARM Consulting

- Assessing cow numbers.... what cows should go and when
- Containing the impact of the feed shortage to one year.... minimizing impact
- Practical steps to stay on the front foot with banks, creditors, family and neighbours

Alexis Killoran, Irrigation Extension Officer, DEDTJR

- Making the most of your water
- Planning your watering intervals and efficiency
- How Ag Vic can help

David Huggins, Nutritionist - Ridley

- Feed budgeting – establishing the feed demand and feed deficit
- Managing a fodder shortage – the five steps
- Buying feed based on quality and value
