

# MASTITIS PROBLEMS IN YOUR HERD?

## Cups On Cups Off

Mastitis and milk quality affect the bottom line of all dairy farms. Dairy Australia estimates that every case of clinical mastitis costs at least \$270 in treatment costs and lost milk.

Cups On Cups Off is a two-day workshop designed by Dairy Australia, delivered by Countdown 2020 trained experts in mastitis and milk quality. Cups On Cups Off helps dairy farmers achieve best practice in milk harvesting, with the emphasis on the detection, treatment and prevention of clinical mastitis.

### Learn about:

- How and why mastitis infections occur
- Practical methods to detect and deal with mastitis
- Adapting your milking process to reduce the risk of infections
- How to develop an action plan to achieve best practice in milk harvesting.

### Details:

- Day 1:** Tuesday 22 October 2019  
9:30 am – 2:30pm (Lunch provided)
- Day 2:** Monday 28 October 2019  
9.30am – 1pm
- Venue:** West Gippsland (Location TBC)
- Presenter:** Andrew Perry
- RSVP:** GippsDairy on 5624 3900 or [info@gippsdairy.com.au](mailto:info@gippsdairy.com.au)

### What others say about Cups On Cups Off training...

*"Whilst I have been milking cows for quite a number of years it provided a fantastic refresher on the basics that need to be followed consistently to have a lower cell count"*

*"...has assisted with team members' ability to identify clinical cases much quicker"*

*"It was great to have the reminder of why I need to do the steps in teat disinfection"*
